

TECHNICAL DATA SHEET

ULTRABIND **GLIDE**

Ultrabind Glide is an innovative trowel cleaner that makes resin bound driveway application a breeze. Its unique formula allows your trowel to glide across the surface, resulting in a smoother, more even application. With Ultrabind Glide, you can enjoy a hassle-free application process and achieve a stunning, durable surface that will last for years to come.

- Lubricates trowel for a smoother application
- Reduces build-up and dirt contamination on trowel
- Reduces resistance when applying resin bound
- Quick, easy to use spray bottle

APPEARANCE & TYPICAL USES

Ultrabind Glide is a clear sprayable liquid designed primarily as a cleaning solution for hand trowels whilst working on resin bound projects. The system doubles as an excellent lubricator reducing the chance of trowel burn and making application easier.

ULTRABIND GLIDE IS THE NEW, SAFER ALTERNATIVE

Ultrabind Glide is the new, safer alternative for trowel cleaning in the resin bound industry. Use of harsh solvents like Xylene can contribute to formation of ground-level ozone, a major component of smog. Ultrabind Glide is non-hazardous, non-flammable, non-carcinogenic, non-corrosive and environmentally safer than comparable cleaning solvents making it the superior choice for resin bound applications.

HEALTH & SAFETY

Non-hazardous, slow evaporating solvent. If on skin rinse thoroughly with soap and plenty of water. Store in tightly sealed container. Protective gloves and splash goggles recommended.

GENERAL GUIDANCE NOTICE

This Data Sheet is for general purposes and may contain information which is not appropriate for certain conditions of use. Further information on this product and the data contained within this sheet can be obtained from our technical department. You can call us on 0330 0570 695 where we will provide free technical advice for your project.

PACKAGING

Ultrabind Glide is supplied in a 500ml trigger spray bottle designed to make application simple and effective.

APPLICATION

As a lubricating spray:

Spray in light amounts directly onto trowel before smoothing surface. Alternatively spray onto a clean cloth and wipe onto trowel. Do not saturate resin bound surface as this may cause resin to settle to the bottom of the layer.

As a cleaning spray:

Spray onto trowel or tools whilst resin is still uncured. Wipe with a clean cloth. Note that Ultrabind Glide will not remove cured resins.
